

Francis Type

Model: MAX-HL (customer-made)

Power Outputs: 30kW - 500kW

Suitable head: 30m-200m

Suitable flow: $0.5\text{m}^3/\text{s}$ - $5\text{m}^3/\text{s}$

Characteristics and Advantages:

Francis Type Hydroelectric Generator is the most widely used in the modern world. Its highest efficiency has reached to 95%; Francis Generator has the most widely coverage water head, from 5m to 700m, but in practical use, mainly from 30m to 300m; Possess as follows advantages: compact design, reliable operation, high efficiency and easy to install and care; mainly type used for power station is divided into two kinds of structures: vertical and horizontal; MAX Machine Francis Mini Hydroelectric Generator mainly ranges from 30kw to 500kw; After years of experience and study, we can meet various requirements for different power station project. Welcome your questions and inquiries.
